Experiment 7 — Sprint Closure and Next Sprint

Description

Experiment 7 — Close the First Sprint and Start the Next Sprint

Sprint 1 closure

- Sprint: Sprint 1 — Accounts (ID 1), ACS board 34.
- State: Closed in Jira on 13 October 2026.
- Planned goal: registration/login foundation, 8 proposed points.
- Review outcome: 0/2 Stories accepted because no verified product increment was available. Incomplete Stories were not falsely marked complete.

Sprint 2 start

- Sprint: Sprint 2 — Alumnex Core (ID 2), state Active.
- Dates retained in Jira: 13–20 October 2026.
- Updated goal: deliver a testable vertical slice across registration/email verification, login/profile access, mentorship requests and career opportunity/application handling.

Add due date

Team

- Planned work: ACS-12 Registration (5), ACS-13 Login (3), ACS-14 Mentorship (5), ACS-15 Career Opportunities (3) = **16 proposed points**, not historical velocity.
- At the current board snapshot, ACS-12 and ACS-13 are In Progress; ACS-14 and ACS-15 are To Do.

Retrospective

ACS-32 — Sprint 1 Retrospective and Improvements records why the first Sprint was not accepted and recommends stricter Definition of Done, earlier integration setup, and explicit test evidence before review. ACS-33 — Definition of Ready and Definition of Done records readiness/acceptance guardrails.

This experiment demonstrates actual Jira sprint lifecycle operations—starting, reviewing, closing and starting the next sprint. It does not claim a successful release or customer acceptance.

Lifecycle evidence: Sprint 1 - Accounts (ID 1) was closed with 0/2 Stories Done. Sprint 2 - Accounts Plus (ID 2) was created and started on board 34 with ACS-12, ACS-13, ACS-14, ACS-15 and a 16-point proposed plan. These counts reflect actual Jira data; no product Stories were falsely marked Done.
